Subject: RE: Submitting procedure 4719 rev 1

David / Steve:

We are having difficulties uploading attached to eWells.

Can you please review / comment and we can upload to eWells when we are able?

Also, I have received an Out-of-Office reply from Steve - please confirm if we are to get this reviewed.

It is important that we get this procedure approved prior to mobilization of vessels.

Thanks for your assistance,
Mike

Subject: Submitting procedure 4719 rev 1

Dennis: please upload the attached to eWells.

Steve:

Attached is the updated procedure 4719 rev 1 for review / approval.

Currently we plan to mobilize the vessels on 4-Jan-2011 to conduct offshore operations.

We would appreciate comments / approval as soon as possible.

Please let us know if you have any questions.

Thanks,
Mike

Subject: RE: Planning for BOEMRE review of revised procedure 4719

Mike,

Steve Dessauer will be in the office next week (and I will be also) and will be available to review the revised procedure. Just let us know when it is submitted in eWell so that it can be reviewed soon afterwards.

Subject: Planning for BOEMRE review of revised procedure 4719

David / Dennis:

With the upcoming holidays, I need some advice on the possible timing for review / approval a revised procedure we're about to issue.

We have targeted a 3-Jan-2011 mob date for vessels to recover the buoy / clump weight assembly during the 1st week of January.

We plan to issue the revised 4719 procedure for BOEMRE review by CoB Friday 17-Dec.

Will we be able to get review / approval of the revised procedure prior to the targeted vessel mob date (3-Jan)?
Or should we plan on a later mob date to ensure procedure approval?

Thanks,
Mike

As background:

4719 (doc 2200-T2-DO-PR-4719 Rev 0.DTS Buoy Clump Weight Recovery) was approved using the Helix Express as the recovery vessel. We need to change our recovery vessel to the Iron Horse and are revising the procedure to match.
